Plas Menai

Health Centre

Project 2-to-1 [2T1]

Llys Meddyg Working Group

1. Introduction

The Plas Menai Health Centre GP Partners recently gained authority by the Betsi Cadwalader University Health Board [BCUHB] to close Llys Meddyg Surgery. As part of the process, the GP Partners undertook an engagement and consultation exercise with its patient and other health provider groups to understand the impact to relevant group in light of the Llys Meddyg Surgery closure. These impacts – four of them – now need to be discussed, assessed and understood further to identify methods, systems and processes that can mitigate impact. It is the task of this working group to identify such mitigation.

2. Aims

It is the aim of the Plas Menai Health Centre GP Partners to bring together an effective, cross agency, mostly community based group of individuals to work together with the clear aim/objective of reducing the burden/impact of the Llys Meddyg Surgery closure to the local patient population and relevant health provider group.

3. Key Areas of Work

Four key areas of impact have been identified during the engagement/consultation exercise. They are:

1. Transport;
2. Community Pharmacy;
3. Car Parking;
4. Access to services.

4. Timelines

The Llys Meddyg Surgery will close on **Friday, 1 June 2018**. It is therefore imperative that the working group – in their efforts – focus on swift progress to provide assurance to patient population and other stakeholders that an effective plan of action is agreed and in progress.

Richard,

Business Manager
On behalf of the GP Partners
